

Ananya Chaudhary

✉ achaudh2@andrew.cmu.edu · 🌐 gogirlgetit · 📄 ananya-chaudhary-3571361b3 · 📍 Pittsburgh, PA

Education

Carnegie Mellon University

Bachelor of Science '25

School of Computer Science,
Computer Science and Human
Computer Interaction

GPA: 3.56

Skills

Languages:

English · French · Hindi

Programming Languages:

Python · Java · C · Objective-C ·
SQL · Swift

Frameworks:

Flask · Keras · Tensorflow ·
Sci-kit · SwiftUI · UIKit

Technologies:

Git · MongoDB

Activities

SPIRIT Fashion Show 34

Treasurer and Fundraising
Coordinator

CMU Athletics

Cheerleading Team

CMU Abhinaya

Manager of Classical dance team

Lunar Gala

Assistant Office and Logistics
Manager

Industry Experience

AWS · SDE Intern

Summer 2024

- Designed and developed an ops tool for the Amazon ESS GuardDuty Threat Intel team
- Handled CRUD operations on DynamoDB for the Malware Detonation Platform
- Streamline and automated various other operational tasks including batch editing using an internal Amazon tooling platform, enhancing the efficiency and accuracy of security operations.

Amazon · SDE Intern

Summer 2023

- Designed and developed Autosave and Undo / Redo features (frontend and backend both with unit tests) within the Notepad for the Kindle iOS app independently as an L4 in the Kindle team.
- Developed using Swift UI and Objective C.
- Implemented a sidebar for the new Kindle for Mac app to replace the tab bar.
- Worked directly with Product and UX team and used customer feedback to prioritize use cases.
- Made secondary navigation destinations accessible from the sidebar such as filters for the library, based on user feedback.

InfinX · Product Management Intern

July 2022 to September 2022

- Created a prototype of Referral Management Software.
- Performed SWOT analysis, wrote out user stories, mapped out user journey.
- Designed mockups and used Adobe XD to create final prototype.

Inspirit AI · AI/ML Teaching Assistant

June 2021 to August 2022

- Worked with a team of Stanford Masters and PhD students.
- Taught basic Machine Learning and Deep Learning techniques such as Linear and Logistic Regression, KNN, Neural Networks, and CNNs in Python to mentor high school students.

Selected Projects

Multimodal Textbook Generator

- Built an ML Model to embed contextually relevant videos to a traditional textbook and create an interactive multimodal digital textbook.
- Extracted features from Youtube videos, experimented with various ML models, generated dataset and used Python to create epubs.

College Student Meal Scraper

- Created a search engine that used web scraping to help college students plan meals based on the ingredients in their refrigerator and their past choices.
- Had a general recommendation model that collated all previous searches as well as liked recipes and then identifies cuisine and taste preferences and produces a list of recipes to try out along with a suggested grocery list.

PageRank

- Recreated a simplified version of the PageRank algorithm using Julia programming language
- Ranked websites based on the links that each website contained within their page

Research and Publications

Effects of Multimodal Textbooks on Learning

Co-Author, International Journal of New Technology and Research
